- d) The screen planting shall be maintained permanently, and any plant material which does not live shall be replaced within one (1) year.
- e) When owing to existing conditions, the provisions of the buffer yard and screen would create a hardship, the property owner may apply to the Zoning Hearing Board for a variance. The Zoning Hearing Board may authorize a reduction and/or waive the buffer yard and screening requirement. See Section 802.

s. 603 Demolition

Demolition of any structure must be completed within three (3) months of the issuance of a permit. Completion consists of tearing the structure down to grade, filling any resulting cavity to grade and removing all resulting materials from the lot. A structure may be partly demolished only if a building remains and the demolition of the part is complete as aforesaid. All evidences of the structure which was demolished must be removed from the exterior surfaces of the remaining building.

s. 604 Drainage

Anytime land in the Borough is altered or built on, the owner shall make every effort technically available and feasible to achieve storm water absorption rather than run off resulting from the alteration or building.

- a) Adequate Drainage Required - No structure for human or animal occupancy or habitation or commercial or industrial structure may be erected or relocated on land:
 - 1) Which is not adequately drained at all times.
 - 2) Which is subject to periodic flooding.
- b) Building Restricted Adjacent to Drainage Channels and Watercourses - No building may be erected or relocated:
 - 1) Within thirty (30) feet of the natural design or constructed edge of a stream channel or open drainage way, provided that the Zoning Hearing Board may authorize a reduction of this dimension when the applicant demonstrates that adequate safeguards have been provided for that natural flow of water downstream so as not to damage public or private property adjacent to said stream or drainage way.
 - 2) So that its lowest floor designed and used for human or animal habitation or occupancy shall be an adequate height above the drainage channel to afford protection from surface and groundwater.
- c) Obstructions - The following shall not be placed or caused to be placed in a stream channel or open drainage way: fences except two-wire fences, other structures or other matter which may impede, retard or change the direction of the flow of water in such stream, or open drainage way, or that will catch or collect debris carried by such water or that is placed where the natural flow of the stream would carry the same downstream to the damage or detriment of either public or private property adjacent to said stream, or open drainage way.

- d) **Structure Effect** - Any structures permitted shall be constructed and placed on the lot so as to offer the minimum obstruction to the flow of water, and shall be designed to have a minimum effect upon the flow and height of flood water.
- e) **Storm water design** - Storm water design shall meet requirements of the Borough Engineer under standard practices in effect.
- f) **Municipal Liability** - The granting of a building permit in any flood plain shall not constitute a representation, guarantee, or warranty of any kind or nature by the Borough or by an official or employee thereof of the practicability or safety of any structure, use or other plan proposed, and shall create no liability upon, or a cause of action against such public body, official or employee for any damage that may result pursuant thereto.
- g) **Installation of Fill Materials** - Fill may be placed at and along the outer line of a modified stream or drainage way when approved as a special exception by the Zoning Hearing Board and subject to the following condition:
 - 1) Satisfactory evidence shall be submitted to the Zoning Hearing Board indicating that the cross-sectional area of the modified stream or drainage way will not be significantly reduced; that there will be no adverse flooding conditions created by the proposed fill.

s. 605.1 Odor, Sound, Light, and Vibrations

Upon receipt of a signed written complaint that odors, noise, light, and/or vibrations are a disturbance in the area, the Zoning Officer shall investigate the complaint.

- a) Odors should not be of a prolonged nature; that is, longer than a day and not recurrent.
- b) Sounds should not be invasive into others' living areas at any time and not noticeably audible between 11:00 p.m. and 6:00 a.m.
- c) Vibrations should not be felt in the residences or businesses on adjacent property.
- d) Light should be directed only to the purpose intended. It should not intrude onto others' living areas.

The Zoning Officer shall notify the violator by personal contact. If immediate or agreed upon action is not forthcoming, the Zoning Officer shall send a certified letter requiring compliance within a time limit set by the Zoning Officer. See Section 1005 for penalties.

At any time these environmental controls can not be determined simply, reference will be made to Section 605.2.

s. 605.2 Environmental Regulations

- a) **Performance Standards** - In all districts all uses and activities established after the effective date of this Ordinance shall comply with the following performance standards; all existing uses and activities in compliance with the following performance standards on the effective date of this Ordinance shall continue in compliance; and all existing uses and activities not in compliance shall bring themselves into compliance within one (1) year of the effective date of this Ordinance.
- b) **Noise** - The sound level of any operation shall not exceed the decibel levels of the preferred frequencies cited below or as modified or exempted. The sound-pressure level shall be measured with an octave band analyzer calibrated in the preferred frequencies conforming to the specifications published by the American Standards Association (Preferred Frequencies for Acoustical Measurements, SI 6-1960, American Standards Association, New York, NY).
 - 1) **Standards** - At no point on the district boundary of or at any point within any District shall the sound-pressure level resulting from any operation in any district exceed the maximum permitted sound levels set forth below expressly or waived in paragraph 2 below.

<u>Center Frequency (Cycles per Second)</u>	<u>Maximum Sound-Pressure Level Decibels)</u>
31.5	65
63	67
125	66
250	59 (Sound pressure
500	52 level in decibels
1,000	46 equals 0.0002
2,000	37 dynes/cm ²)
4,000	26
8,000	17

2) **Waivers** - The following sources of noise are exempt.

- i) Transportation vehicles not under the control of an on-site use.
- ii) Occasionally used safety signals, warning devices and emergency pressure-relief valves.
- iii) Temporary construction activity between 7:00 a.m. and 7:00 p.m.

c) **Vibration** - No use shall cause vibrations exceeding the maximum values specified in this section. The maximum vibration is given as particle velocity which may be measured directly with suitable instrumentation or computed on the basis of displacement and frequency. When computed, the following formula shall be used:

$$PV = 6.28 F \times D \text{ where}$$

PV = Particle velocity, inches per second
F = Vibration frequency, cycles per second
D = Single amplitude displacement of the vibration inches

Particle velocity shall be the vector sum of three individual components measured simultaneously in three mutually perpendicular directions.

MAXIMUM GROUND TRANSMITTED VIBRATION

<u>Zoning District</u>	<u>Particle Velocity (Inches/Second)</u>	
	<u>Adjacent Lot Line</u>	<u>Residential District</u>
Residential	0.05	0.02
Commercial & Industrial	0.10	0.02

Where vibration is produced as discrete impulses and such impulses do not exceed a frequency of sixty (60) per minute, then the values of this table may be multiplied by two.

- d) **Heat** - No heat from any use shall be sensed at any property line to the extent of raising the temperature of air or materials more than one degree F.
- e) **Glare** - In Commercial and Industrial Districts, any operation or activity producing glare shall be conducted so that direct or indirect light from the source shall not cause illumination in excess of 0.5 foot candles when measured in any district other than a Commercial or Industrial.
- f) **Air Pollution** - Ambient air quality standards have been established by the Commonwealth of Pennsylvania. In order to minimize overlapping regulations, the Borough adopts these standards as its own. However, to govern situations of localized nature, the following additional regulations are provided.

- g) Odor - Odor threshold is defined as the lowest concentration of odorous matter than produces an olfactory response in normal human beings. Odor thresholds shall be measured in accordance with ASTM 1931-57 "Standard Method of Measurement of Odor in Atmosphere (Dilution Method)" or its equivalent.
- 1) Odorous material released from any operation or activity shall not exceed the odor threshold concentration beyond the lot line, measured either at ground level or habitable elevation.
 - 2) Should any such odorous material contain toxic material, such airborne toxic matter shall not exceed one-thirtieth (1/30) of the odor threshold at the appropriate points of measurement.
- h) Smoke - for the purpose of grading the density or equivalent opacity of smoke, the Ringelmann Chart published by the U.S. Bureau of Mines shall be used.
- i) Application of Performance Standards
- 1) Any use established or changed to and any building, structure or land developed, constructed or used for any use or any accessory use thereto shall comply with all the performance standards herein set forth.
 - 2) If any existing use or building or other structure is extended, enlarged or reconstructed, the performance standards herein set forth shall apply to such extended, enlarged or reconstructed portion or portions of such use, building or other structure.
 - 3) Determinations necessary for administration and enforcement of performance standards

set forth herein range from those which can be made with satisfactory accuracy by a reasonable person using normal senses and no mechanical equipment to those requiring great technical competence and complex equipment for precise measurement. It is the intent of this Ordinance that:

- i) Where determination can be made by the Zoning Officer or other Borough employees using equipment normally available to the Borough or obtainable without extraordinary expense, such determinations shall be so made before notice of violation is issued.
 - ii) Where technical complexity or extraordinary expense makes it unreasonable for the Borough to maintain the personnel or equipment necessary for making difficult or unusual determinations, procedures shall be available for causing corrections of apparent violations of performance standards, protecting individuals from arbitrary, capricious and unreasonable administration and enforcement of performance standard regulations and protecting the general public from unnecessary costs for administration and enforcement.
- 4) If the Zoning Officer finds after making determinations in the manner set forth in this Ordinance, that there is a violation of the performance standards set forth herein, he shall take or cause to be taken lawful action to cause correction to within the limits established by such performance standards. Failure to obey lawful orders concerning such corrections shall be punishable under the provisions of Section 1005.
 - 5) If, in the considered judgment of the Zoning Officer, there is probably violation of the performance standards set forth herein, the following procedures shall be followed:
 - i) The Zoning Officer shall give written notice, by certified mail, to the person or persons responsible for the alleged violation. The notice shall describe the particulars of the alleged violation and reasons why the Zoning Officer believes there is a violation and shall require an answer or correction of the alleged violation to the satisfaction of the Zoning Officer within a time limit set by the

Zoning Officer. The notice shall state, and it is hereby declared, that failure to reply or correct the alleged violation to the satisfaction of the Zoning Officer within the time set constitutes admission of violation of the terms of this Ordinance. The notice shall state that, on request of those to whom it is directed, technical determinations shall be charged against those responsible for the violation, in addition to such other penalties as may be appropriate, but that, if it is determined that no violation exists, the cost of the determination will be paid by the Borough.

- ii) If there is no reply within the time limit set but the alleged violation is corrected to the satisfaction of the Zoning Officer, he shall note "Violation Corrected" on his copy of the notice and shall retain it among his official records, taking such other action as may be warranted.
- ii) If a reply is received within the time limit set indicating that the alleged violation will be corrected to the satisfaction of the Zoning Officer but requesting additional time, the Zoning Officer may grant an extension of time if he deems it warranted in the circumstances of the case and if the extension will not, in his opinion, cause imminent peril to life, health or property.
- iv) If a reply is received within the time limit set requesting technical determination as provided in this Ordinance and if the alleged violation continues, the Zoning Officer must call in properly qualified experts to make the determinations. If such determinations indicate violation of the performance standards, the cost of the determinations shall be assessed against the person or persons responsible for the violation, in addition to such other penalties as may be appropriate under the terms of Section 1005. If no violation is found, the costs of the determinations shall be paid by the Borough without assessment against the person or persons involved.

j) Concentration of Odors or Waste

In order to prevent buildup or concentration of waste or odors, industrial waste products and/or pumice (excluding household and/or agricultural waste) shall not be spread in Stewartstown Borough within one (1) mile from sewer treatment facilities, storage lagoon or spray facilities which treat, hold or spray industrial waste. Provided, however, that this shall not be interpreted to preclude, the spreading of materials resulting from the cleaning of lagoon, which materials are promptly plowed down and which cleaning does not occur at more frequent than four-year intervals.

k) Water Pollution

For purposes of this Ordinance, a water supply or source shall be considered polluted if it is polluted, degraded, contaminated or discolored in any way. Any observable activity or the failure to correct a causative condition shall be seen as polluting activity and is prohibited. Violations are subject to the provisions of Section 1005.

s. 606 Home Occupation

No Display of products may be shown so as to be visible from outside the dwelling or the accessory structure. A name plate not larger than two (2) square feet in area shall be permitted. It may be illuminated only by direct lighting.
 - 3) Not more than thirty (30) per cent of the habitable floor area of a dwelling unit may be devoted to a home occupation.

Motor vehicle repair facility is a use which tends to create noise audible outside the building in which the use is being conducted.

The applicant must include with the application for use certificate such drawing as will enable the Zoning Officer to have an adequate record of the location and extent of the proposed use. The applicant must also supply to the Zoning Officer such information as will enable the Zoning Officer to ensure that all of the above enumerated requirements are met. - 3) If a new building is to be constructed or placed, or an existing accessory building is to be enlarged or a building constructed or placed after January 1, 1988, is to be utilized to accommodate the proposed use, the building after enlargement or construction shall not have a ground floor area in excess of fifty (50) percent of the ground floor area of the dwelling unless the building is at least five hundred (500) feet from any neighboring residence;
- 4) The use shall not create any vibrations, smoke, dust, odor, heat or glare detectable beyond the property of the owner of the use.
